Resume System – Trial Task Guide

We are creating a next-generation **Resume Building & Career Ecosystem** designed for students and professionals. This platform will allow users to generate dynamic, verified resumes automatically based on their real achievements from internships, courses, hackathons, and projects.

This document provides details about your **trial task**, which will help us assess your technical, creative, and problem-solving abilities. The task duration is **3–4 days**.

◼ Project Overview

The goal is to build a connected ecosystem that integrates multiple sub-platforms: Internship & Training Platforms Hackathon Platforms Online Learning & Course Platforms Project and Skill Verification Modules Each activity completed by a student will automatically update their professional resume in real-time.

◼ Trial Task Objective

Your task is to **conceptualize and develop one core component** of this ecosystem based on your area of expertise. You may choose from the following categories:

- 1. Frontend Development – Design a modern UI for the resume preview and customization page (React/Next.js preferred).

- 2. Backend Development – Build APIs for managing resume data, authentication, and cross-platform integration.

- 3. UI/UX Design – Create user flow and prototype screens showcasing how users can generate and edit resumes.

- 4. AI/Automation – Implement a logic that auto-generates a professional resume summary based on user data.

- 5. Database Architecture – Design relational tables for users, projects, courses, achievements, and skills.

◼ Expected Output

By the end of the trial (within 3–4 days), you should submit: A working prototype, mockup, or design (GitHub/Drive/Figma link). A short note describing your approach, tools used, and how your module contributes to the system.

◼ Evaluation Criteria

- Creativity and Problem Solving

- Code/Design Quality

- Integration Readiness

- Documentation & Presentation

- Timely Submission

■ Submission Details

Submit your work within **3–4 days** of receiving this document. Include all relevant links and a brief explanation in your submission email under the subject line **"Trial Task – Resume System"**.

Best of Luck!
We look forward to seeing your creativity and innovation.
